

ARCTIC SCIENCE SUMMIT WEEK 2023 THE ARCTIC IN THE ANTHROPOCENE
17–24 FEBRUARY 2023, UNIVERSITY OF VIENNA

ARCTIC INFRA SCAPES

ARCTIC INFRA SCAPES IS A SERIES OF EVENTS INCLUDING SCIENCE SESSION, AN EXHIBITION, AND A ROUNDTABLE, WHERE *INFRA* STANDS FOR INFRASTRUCTURES AND THE *SCAPES* REFERS TO THE MULTIPLE WAYS OF CONVERGENCE OF ARTS, SCIENCE, LOCAL AND INDIGENOUS KNOWLEDGE (ArtSLInK).

18–23 FEBRUARY 2023

EXHIBITION involves artists and scholars observing and depicting infrastructures in collaboration with local communities and Indigenous peoples, in various experimental art forms and epistemological genres. Its semiotics develops through visual and verbal modes of communication that are based on various representations of distance, time, and space within the ontological frameworks of the Arctic infrascapes.

CURATED BY OLGA ZASLAVSKAYA (HUNGARY)
AND JAMES TEMPTTE (USA)

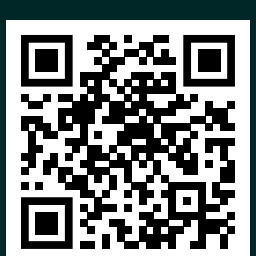

21 FEBRUARY 2023

SCIENCE SESSION aims to discuss interim results of several ongoing scientific and art-based research projects that focus on the Arctic and its infrastructures.

ID:26 “Arctic InfraScapes”: engaging communities, environment and infrastructures through arts, science, local and Indigenous knowledge
